¹Total proposed funding for EERE in the FY2020 Budget Request is \$696 million, roughly a 71% cut from FY2019 funding levels. However, the Administration proposes to reach the \$696 million by combining \$343 million in new appropriations with \$353 million from prior fiscal years. Therefore, the proposal for new funding is actually an 86% cut from current funding levels. The programs identified above represent a subset of EERE, which is why the sum does not equal \$696 million.

* Includes an additional \$3 million for Training and Technical Assistance that supports the Weatherization Assistance Program.

** Includes an additional \$500,000 for Training and Technical Assistance that supports the Weatherization Assistance Program
