Add up points from the 10 questions you answered for your total.

45–60 AWESOME!! You're doing a great job of busting those Energy Hogs in your home. Keep up the good work!

31–44 ALMOST! You're on your way to becoming an Energy Hog Buster, but there's more to do. Those Hogs might be creeping into areas of your house like your attic (think "Insulation!")—or add weatherstripping around drafty doors and windows to stop them from sneaking in.

20–31 OINK! OH Nooo!

Taking the Energy Hog Scavenger Hunt is the first step. The next step is to bust the Energy Hogs lurking in your home. They live in places that need insulation, like the attic. In the winter, try to use less heat in your home by wearing warmer clothes. During hot summer days, close the shades and use fans to cool off.

Change 4 for the planet!

Families that replace the four most used 60-watt incandescent bulbs with 13-watt compact fluorescent bulbs can save about \$130 over the life of the bulbs. If all U.S. households did this, we'd lower air pollution so much that it would be like removing almost 18 million cars from the road each year!
